Cornell Notes	Unit 7 Industrial and Economic	Name:		
	Development Patterns and Processes			
AVID	Chapter 20: Globalization, Interdependence, and Sustainability	Class/Period:		
Decades of College Breams		Date:		
20.3 Developing a Sustainable World				
Questions:	Natural Resources, Development, a of natural resources, environmenta displacement of indigenous groups technology in Singapore, renewable periphery countries more negatively environmental effects)	in the Amazon by the oil industry, e energy in the USA, why are		
	Sustainable Development Goals (what d Australia, Brazil, what global challenges Goals seek to address, what is India doin Act)	do the UN's Sustainable Development		

Go to page 561 and read the Case Study there. Explain how and why Iceland's efforts to make 100% fish utilization are working.
Ecotourism (define it, list 3 of the bullet pointed principles of ecotourism, what is Eco lodging and give an example, African safaris)
1. Explain why pollution and environmental issues might be more difficult to address in peripheral and semi-peripheral countries than in core countries.
2. Identify which of the UN Sustainable Development Goals are most relevant to the USA and other core countries. Explain why.

On page 565, explain how the efforts of the Boiling River Project support the UN's sustainability goals. To which of the UN Sustainable Development Goals do they relate the most?
