	Industrial and Economic Development	Name:	
	ns and Processes r 19: Measuring Human Development	Class/Period:	
AVID Decades of College Dreams	8	Date:	
19.1 How Is Development Measured?			
<u> </u>			
Questions: Economic Indicators (human development, core countries, periphery			
	countries, and semi-periphery countries)		
	Development in the is the process of	general sense	
	is the process of	change in	
	the nature and acti	vities of the	
	economy of a region	or country	
	and subsequent increa		
	Income Gross Domestic Product, Gross National Product, Gross National Income, Use the chart at the top of page 522-list the top 5 countries, scanning		
the chart, are most of the countries core, periphery, or semi-periphery?)			
	GDP and GNP are w	lays of measuring	
	economic growth within a country.		
	tormal and inform sectors are things.		
	Informal is like government		
	and stuff and formal is another		
	thing that relates to sectors.		
	Economic Structure (As countries develop what sector do most of the population work in, formal sector, money collected by the formal sector is used how, informal sector, negatives of the informal sector, % of informal sector in core vs periphery countries)		
	In addition to clas	isifying economic	
	sectors, the structur	e of an economy	
	can also be broken	into two	
	categories. the f	ormal sector	
		ctor. The formal	
		nesses, enterprises	
	and other economic		
	that have governme		
	monitoring, and pr	,	

are taxed.
