	Unit 7 Industrial and Economic Development Name: Patterns and Processes
X AZID	Chapter 19: Measuring Human Development Class/Period:
Decades of College Dreams	Date:
19.1 How Is Development Measured?	
Questions:	Economic Indicators (human development, core countries, periphery countries)
	Development in the general sense
	is the process of change in the nature and activities of the
	nature and activities of the
	economy of a region or country
	and subsequent increases.
	Income (Gross Domestic Product, Gross National Product, Gross National Income, Use the chart at the top of page 522-list the top 5 countries, scanning the chart, are most of the countries core, periphery, or semi-periphery?)
	GDP and GNP are ways of neasuring
	economic growth within a country.
	Formal and inform sectors are things.
	Informal is like government
	and stuff and formal is another
	thing that relates to sectors.
	Economic Structure (As countries develop what sector do most of the population work in, formal sector, money collected by the formal sector is used how, informal sector, negatives of the informal sector, % of informal sector in core vs periphery countries)
	In addition to classifying economic
	In addition to classifying economic sectors, the structure of an economy
	can also be broken into two
	categories: the formal sector
	and the informal sector. The
	formal sector includes businesses,
	enterprises, and other economic
	activities that have government
	supervision monitoring and protection

and

are taxed.
