Chapter 20: Globalization, Interdependence, and Sustainability  Date:  20.3 Developing a Sustainable World  Questions:  Natural Resources, Development, and Consumption (countries with lot of natural resources, environmental consequences of development, displacement of indigenous groups in the Amazon by the oil industry, technology in Singapore, renewable energy in the USA, why are periphery countries more negatively impacted by negative environmental effects)  The natural resources in Mineral rich  COUNTRIES LIKE CANADA and India are  NORTH TELLIFORMENT OF ADMINISTRATION WAS TELLIFORMENT OF ADMINISTRATION WAS TELLIFORMENT OF THE ENVIRONMENTAL CONSEQUENCES  OF DEVElopment. The Oil industry has displaced indigenous recycles. Periphery  COUNTRIES CANADA CONSERVATION.
20.3 Developing a Sustainable World  Questions:  Natural Resources, Development, and Consumption (countries with lot of natural resources, environmental consequences of development, displacement of indigenous groups in the Amazon by the oil industry, technology in Singapore, renewable energy in the USA, why are periphery countries more negatively impacted by negative environmental effects)  The MATWAI VESOURCES IN MINERAL VICH  COUNTRIES LIKE CAMADA AND INDIA AVE  WORTH TRILLIANS OF ADLIANS AND BOOST  THE COUNTRY'S ECONOMY. POILINTION WASTE,  AND THE LOSS OF MABITATS AVE JUST  SOME OF THE ENVIRONMENTAL CONSEQUENCES  OF DEVELOPMENT. THE OIL INDUSTRY MAS  DISPLACED INDIA AND SPECIALS. PERIPHERY
Questions:  Natural Resources, Development, and Consumption (countries with lot of natural resources, environmental consequences of development, displacement of indigenous groups in the Amazon by the oil industry, technology in Singapore, renewable energy in the USA, why are periphery countries more negatively impacted by negative environmental effects)  The NATURAL VESOURCES IN MINERAL VICH  COUNTRIES LIKE CANADA AND INDIA AVE  WORTH TVILLIONS OF dOLLARS AND BOOST  THE COUNTRY'S ECONOMY. POLLATION WAS TEXT  AND THE LOSS OF HABITATS ARE JUST  SOWE OF THE ENVIRONMENTAL CONSEQUENCES  OF DEVELOPMENT. THE OIL INDUSTRY HAS  DISPLACED INDIA AND RECORDED. PERIPHERY
of natural resources, environmental consequences of development, displacement of indigenous groups in the Amazon by the oil industry, technology in Singapore, renewable energy in the USA, why are periphery countries more negatively impacted by negative environmental effects)  The natural resources in Mineral rich  countries like canada and India are  worth trillions of dollars and boost  the country's economy. Pollution, waste,  and the loss of habitats are just  some of the environmental consequences  of development, the oil industry has  displaced indiagenous peoples. Periphery
of natural resources, environmental consequences of development, displacement of indigenous groups in the Amazon by the oil industry, technology in Singapore, renewable energy in the USA, why are periphery countries more negatively impacted by negative environmental effects)  The natural resources in Mineral rich  countries like canada and India are  worth trillions of dollars and boost  the country's economy. Pollution, waste,  and the loss of habitats are just  some of the environmental consequences  of development, the oil industry has  displaced indiagenous peoples. Periphery
countries like canada and India are worth trillions of dollars and boost the country's economy. Pollution, waste, and the loss of habitats are just some of the environmental consequences of development. The oil industry has displaced indigenous peoples. Periphery
countries like canada and India are  vorth trillions of dollars and boost  the country's economy. Pollution, waste,  and the loss of habitats are just  some of the environmental consequences  of development. The oil industry has  displaced indigenous peoples. Periphery
worth trillions of dollars and boost the country's economy. Pollution, waste, and the loss of habitats are just some of the environmental consequences of development. The oil industry has displaced indigenous peoples. Periphery
the country's economy. Pollution, waste, and the loss of habitats are just some of the environmental consequences of development. The oil industry has displaced indigenous peoples. Periphery
and the loss of habitats are just some of the environmental consequences of development. The oil industry has displaced indigenous peoples. Periphery
of development. The oil industry has displaced indigenous peoples. Periphery
displaced indigenous peoples. Periphery
Sustainable Development Goals (what do they seek to do, success of Sweden, Australia, Brazil, what global challenges do the UN's Sustainable Development Goals seek to address, what is India doing, what is the Philippine Green Jobs Act)
avernments have adopted development
policies that attempt to remedy problems
From natural wass consumption Sweden
and Brazil are using green energy. Sustainable
Development Goals are intended to
reduce inequalities away countries.
' J

Co to make 561 and wood the Cogo Study there Empley how and why Isoland's
Go to page 561 and read the Case Study there. Explain how and why Iceland's efforts to make 100% fish utilization are working.
Iceland is seeing success due to their
vessels traveling further, their tactic
of saving space by cutting out organs, and their all year round fishing season.
and their all year round fishing season.
Ecotourism (define it, list 3 of the bullet pointed principles of ecotourism, what is Eco lodging and give an example, African safaris)
ecotourism is to gain revenue through
tourism with minimal environmental
impact. 3 points: minimize impacts
on local areas, provide financial benefit
for conservation, build environmental
avvareness. ex of eco lodging: cave
house.
1. Explain why pollution and environmental issues might be more difficult to address in peripheral and semi-peripheral countries than in core countries.
peripheral countries have a harder time
Fighting pollution due to weak government
action. Also there way be a lack of
mynev.
2. Identify which of the UN Sustainable Development Goals are most relevant to the USA and other core countries. Explain why.
GOOL 7 is the wost velevant to the
U.S. A wajor portion of energy in the
USA is driven by Aussil Finels. For prolonged
sustainability we must start investing
in alternatives such as nuclear and
nater.

On page 565, explain how the efforts of the Boiling River Project support the UN's sustainability goals. To which of the UN Sustainable Development Goals do they relate the most?
the Builing River Project is supported
by the UN's quals 15 and 12 these quals
explain their commitment to protect
the environment and forests as a whole.
they want to limit climate change and
desertification.
