	Unit 7 Industrial and Economic Development Name: Patterns and Processes
X AT HES	Chapter 19: Measuring Human Development Class/Period:
Decades of College Dreams	Date:
19.1 How Is Development Measured?	
Questions:	Economic Indicators (human development, core countries, periphery countries)
	Development in the general sense
	is the process of change in
	the nature and activities of
	the economy of a region or country
	and subsequent increases.
	Income (Gross Domestic Product, Gross National Product, Gross National Income, Use the chart at the top of page 522-list the top 5 countries, scanning the chart, are most of the countries core, periphery, or semi-periphery?)
	economic growth within a country.
	Formal and inform sectors are
	things. Informal is like government
	and stuff and formal is another
	thing that relates to sectors.
	Economic Structure (As countries develop what sector do most of the population work in, formal sector, money collected by the formal sector is used how, informal sector, negatives of the informal sector, % of informal sector in core vs periphery countries)
	In addition to classifying economic
	sectors, the structure of an economy
	can also be broken into two categories:
	the formal sector and the informal
	sector. The formal sector includes
	businesses, enterprises, and
	other economic activities that
	have government supervision, monitoring
	and protection, and are taxed.
